

Appl. No. : 10/829,135
Filed : April 21, 2004

IN THE SPECIFICATION:

Please amend the following paragraph as indicated:

[0031] In general, a variety of means may be used to connect ~~connected~~ the links 22. Preferably, at least two of the links 22, such as end links, may be readily connected from one another, such as with a clasp. As illustrated, such links need not include a magnetic element, but may simply be clasp links or members. This allows the user to open the bracelet 20 to place it on their wrist, and then re-secure it. Such methods and configurations are well known to those of skill in the art.
